Bachelor's Degree in computer science | Future University in Egypt
Major: cs
SEP 2016 – JUNE 2021
CGPA: Good

Graduation Project

Name: An automated Enterprise system for big data analysis using machine learning

- Project objective is to build a system to help the decision maker detecting the change percentage happening in specific area around the earth's surface. It is an enterprise system for Applying selected machine learning techniques to analyze, classify and compute change detections for the provided satellite images as a sample of big data (Satellite imagery). This proposed system will support the government's control over the illegal construction on the arable land and could also detect the changes occurring at the Grand Ethiopian Renaissance Dam

FEB 2022 – AUG 2022

EXPERIENCE

JUNE 2020 – AUG 2020
- Internships in jelecom Egypt (Embedded System development)
- Internships in Arabian computer company (Software developer)

TECHNICAL SKILLS

- java
- python
- JavaScript/html/CSS
- SQL
- Assembly
- object Pascal _Delphi
- apachy_tomcat
- Django python
